

Ohio Crop Weather

Planting Continued Despite Cold Temperatures

Farmers made planting progress last week despite temperatures averaging more than 10 degrees below normal, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. Freezing temperatures late in the week endangered crops already emerged and caused damage to fruit trees in bloom. The entire State averaged less than 1 inch of precipitation. There were 4.2 days suitable for fieldwork during the week ending May 10.

In addition to planting, farmers installed tile, tilled soil, sprayed herbicides, and applied fertilizer. Sixty-nine percent of **pasture and range** was considered good or excellent compared to 51 percent last year. **Oats** were 46 percent emerged compared to a five-year average of 48 percent. Corn planted progress was 33 percent, 3 percentage points behind the five-year average. Last week, farmers in Northwest Ohio pushed their planters hard, planting corn and soybeans at a rapid clip.

Soil Moisture: Week Ending 05/10/20				
Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	1	9	68	22
Subsoil moisture	0	6	71	23

Crop Progress: Week Ending 05/10/20				
Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year average
Days Suitable for Fieldwork	4.2	2.5	NA	NA
Corn Planted	33	10	3	36
Corn Emerged	3	0	1	11
Soybeans Planted	24	7	2	14
